DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Sunday, 25 June 2023 at 01:30 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Much of the UK should see Low air pollution levels as unsettled conditions make inroads from the west, however areas of eastern England are likely to retain Moderate air pollution in advance of this.

Tomorrow: Air pollution levels should become generally Low with the arrival of Atlantic-sourced weather conditions.

Outlook: Mainly unsettled through this period and increasingly breezy in places, helping to keep air pollution levels generally Low.
